~~SECRET~~ [REDACTED]  
CENTRAL INTELLIGENCE AGENCY [REDACTED]

Key to Attachment B

- 1 -

1. Waterworks
  2. Few material stores
  3. Administration Building
  4. Stores of material for the locksmith's workshop
  5. Rubber workshop for rubberizing of pipes for chlorine
  6. Locksmith's workshop
  - 7-8. Milling machines and lathes (insufficient quantity)
  9. Workshop for preparation of graphite electrodes
  10. Kitchen and canteen for workers
  11. Boiler house, two boilers, maximum pressure of 6 atmospheres (insufficient). During 1950 new high-pressure boilers are to be installed (Overpressure - 15 Atm.)
  12. New Administration Building
  13. Gatekeeper's room
  14. Pay office
  15. Guardroom of the factory militia (18-20 men)
  16. Factory physician
  17. Garages for the cars and fire fighting equipment.
  18. Office of the Head of the Electrolysis Section and of the Security Officer
  19. Electrical Department, spare dynamo driven with Diesel motors
  20. Compressors for chlorine liquefaction, production of the hydrochloric acid.
  21. Calcium storage
  22. Building for electrode fitting and repair.
  23. Storehouse - Shipping of hydrochloric acid
  24. Tanks for chlorine
  25. Manufacture of condensed sodium hydroxide and sodium hypochloride
  26. Ethylene tank
  27. Discharge valve
  27. Workshop for production of synthetic materials
  28. Storehouse of the Research Institute
  29. Stores for spirits for ethylene (production two barrels per 6,000 l.(sic))
  30. Factory chimney
  31. Concrete bunkers for use of factory militia
  32. Concrete wall (height 3 m)
- E<sub>2</sub>: Electrolysis  
 E<sub>6</sub>: Building of the Research Institute, Building Construction Dept., Manager's Office, Office of the Factory Council  
 E<sub>16a</sub>: Stores of electric motors, pumps and presses obtained as reparations from Germany  
 E<sub>16</sub>: Half-Production of the Research Institute; laboratory and production of concentrated sodium hydroxide  
 E<sub>20a</sub>: Production of trichlorethylene  
 E<sub>20b</sub>: Production of acetylene  
 E<sub>21a</sub>: Production of ethylene  
 F<sub>3</sub>: Transformer  
 S<sub>3</sub>: Nightguard - 2 men
